## **ABSTRACT**

This project “TRAVEL AND TOURISM MANAGEMENT” is used to automate all process of the travel and tourism, which deals with creation, booking and confirmation and user details. The project is designed HTML-PHP as front end and Microsoft SQL Server 2008 as backend which works in any browsers. The coding language used HTML and PHP. Travel and tourism management system is used to book a tour from anywhere in the world by a single dynamic website which will help the user to know all about the places and tour details in a single website. The admin can add packages to the website from a certain travel agents and hotels by create a tour page. Then the users can sign in and book each project, they can be confirmed by the admin in their manage booking page. The user can see the confirmation in their my booking page. It is an easiest platform for all travelers which can be easily booked and know the all details. Keywords: Travel and tourism management, travel packages, tourism, package booking

## **ACKNOWLEDGEMENT**

After the successful implementation of our project, we overcome with a sense of gratitude towards those people, without whose support, guidance and cooperation this would never have been possible.

First and foremost we would like to thank our **Guide Ms. Khatake S.R.** for her valuable guidance which provided us with a perfect path on which we were able to successfully implement our ideas.

We heartily like to thank our **Principal Mr. Deshpande S.R.** for their valuable support. Last but not least we would like to thank all our classmates and parents for their enthusiasm and great ideas.

## **PART A**

### **Microproject Proposal**

#### **“Tourist and Tourism”**

#### **1.0 Brief Introduction:**

Travel and tourism management system is used to book a tour from anywhere in the world by a single dynamic website which will help the user to know all about the places and tour details in a single website. The admin can add packages to the website from a certain travel agents and hotels by create a tour page. Then the users can sign in and book each project, they can be confirmed by the admin in their manage booking page. The user can see the confirmation in their my booking page. It is a easiest platform for all travelers which can be easily booked and know the all details. Tour Management system is a dynamic website for tourism business. It is dynamic and responsive web design. It is also called travel technology solution for agencies & tour operation. Nearly Everyone goes on a vacation for this ‘a Tourism management system’ would play a vital role in planning the perfect trip. The tourism management system allows the user of the system access all the details such as location, events, etc.

#### **2.0 Aim of Project:**

The goal is to create a system that handles all aspects of travel, such as scheduling, excursions, etc. This system links consumers and agents directly, provides a feedback method for tourists, manages and regulates the collection of tourists' information, and provides a range of travel services.

### **3.0 Action Plan:**

<b>Sr. No</b>	<b>Details of activity</b>	<b>Planned commencement date</b>	<b>Planned Finish date</b>	<b>Roles and Responsible assigned to whom</b>
1.	<b>Collect data from different Sources (books/internet/etc.)</b>	06-01-2024	08-01-2024	Chavan B. A.
2.	<b>Collect data from similar Systems</b>	08-01-2024	18-01-2024	Chavan S. N.
3.	<b>Analysis of the collected data &amp; to generate useful information from it</b>	13-01-2024	20-01-2024	Dalavi R. N.
4.	<b>Prepare required drawings and detailed plan for execution of the work.</b>	20-01-2024	27-01-2024	Kumbhar K. P.
5.	<b>Present generated information visually in the form of appropriate coding</b>	27-01-2024	29-01-2024	Chavan B. A.
6.	<b>Use of Equipment</b>	03-02-2024	05-02-2024	Chavan S. N.
7.	<b>Prepare the Micro-project report</b>	12-02-2024	24-02-2024	Dalavi R. N.
8.	<b>Prepare presentation</b>	02-03-2024	04-03-2024	All members

### **4.0 Resources Required:**

<b>Sr. No.</b>	<b>Name of Resource</b>	<b>Specification</b>	<b>Qty /Units</b>	<b>Remark</b>
1	Laptop	Lenovo, Windows 10	1	
2	Software	Notepad, sublime text	1

**PART B**  
**Micro-Project Report**  
**“Tourist and Tourism”**

**1.0 Brief Introduction:**

Travel and tourism management system is used to book a tour from anywhere in the world by a single dynamic website which will help the user to know all about the places and tour details in a single website. The admin can add packages to the website from a certain travel agents and hotels by create a tour page. Then the users can sign in and book each project, they can be confirmed by the admin in their manage booking page. The user can see the confirmation in their my booking page. It is a easiest platform for all travelers which can be easily booked and know the all details. Tour Management system is a dynamic website for tourism business. It is dynamic and responsive web design. It is also called travel technology solution for agencies & tour operation. Nearly Everyone goes on a vacation for this ‘a Tourism management system’ would play a vital role in planning the perfect trip. The tourism management system allows the user of the system access all the details such as location, events, etc.

**2.0 Aim of Project:**

The goal is to create a system that handles all aspects of travel, such as scheduling, excursions, etc. This system links consumers and agents directly, provides a feedback method for tourists, manages and regulates the collection of tourists' information, and provides a range of travel services.

**3.0 Course Outcomes Integrated:**

1. Use html formatting tags to present content on web page.
2. Develop web page using lists and hyperlinks.
3. Develop web page using images, colors and background.
4. Apply presentation schems on content using CSS.

**4.0 Actual Procedure Followed:**

1. Focus on the selection of an appropriate topic for the microproject .
2. To prepare a report in tourist and tourism .
3. Brief study on our topic.
4. Analysis all study of our topic in detail.

ABOUT US

Our Touriat and Tourism

At JourneyJet we're passinate about helping travelers explore the world and create unforgettable experiences. Whetehr you are planning weekend getaway, a family vacation, or a solo adventure, we are here to provide you with all the resources and inspiration you need to make your journey extraordinary.

our team consists of avid travelers and tourism enthusiasts who are dedicated to curating the best travel tips, destination guides, and insider recommendations.We understand that every traveler is unique, so we strive to offer a diverse range of content to cater to all interests and preferences.

From breathtaking natural wonders to vibrant cultural experiences, we believe that travel has the power to enrich our lives and broaden our perspectives. That's why we are committed to promoting responsible and sustainable tourism practices, ensuring that future generations can continue to enjoy the beauty and diversity of our planet.

# Taj Mahal

The Taj Mahal is an ivory-white marble mausoleum on the south bank of the Yamuna river in the Indian city of Agra. It was commissioned in 1632 by the Mughal emperor, Shah Jahan (reigned from 1628 to 1658), to house the tomb of his favourite wife, Mumtaz Mahal. The tomb is the centrepiece of a 17-hectare (42-acre) complex, which includes a mosque and a guest house, and is set in formal gardens bounded on three sides by a crenellated wall.

Construction of the mausoleum was essentially completed in 1643 but work continued on other phases of the project for another 10 years. The Taj Mahal complex is believed to have been completed in its entirety in 1653 at a cost estimated at the time to be around 32 million rupees, which in 2015 would be approximately 52.8 billion rupees (U.S. \$827 million). The construction project employed some 20,000 artisans under the guidance of a board of architects led by the court architect to the emperor, Ustad Ahmad Lahauri.

Mughal history is one of the most fascinating in the world. The Taj Mahal is reminiscent of the Mughal era as it was built by Mughal Emperor Shah Jahan back in the 17th century. It provides testimony to the grand royalty and luxurious lifestyle of the Mughals. A visit to the Taj Mahal takes you back in time to that magical era giving your mind a virtual break from the current times.

The Taj Mahal is a brilliant piece of Mughal architecture more than anything else. It is simply one of the most stunning monuments ever built. It is built completely of semi-translucent white marble and took 22 years for completion. You will see why it took this long when you notice the details of the marvelous, grand structure with an open mouth and an amazed heart.

The Taj Mahal has been showcased in several movies in India and in Hollywood. The beauty of the Taj Mahal adds so much to every frame that you cannot help but wonder what it would be like to be there. Watching your favorite stars dancing or strolling around the Taj Mahal adds to its glamour quotient.

The Taj Mahal has been part of several lists of important places in the world – the seven wonders being one of them. It has also been recognized as a UNESCO World Heritage Site. You wouldn't want to miss out seeing such a monument when you are in the country that holds it.

Shah Jahan built the Taj Mahal for his second wife, Mumtaz Mahal, who died in 1631 whilst giving birth to their fourteenth child. All the effort, time and excellence involved in building this beautiful monument resulted out of the feeling of love that the Emperor had for his wife. When you stand in front of the Taj Mahal with this in mind, you begin to experience an emotion close to the Emperor's love itself.

## Pink City

Jaipur is the capital and the largest city of the north-western Indian state of Rajasthan. As of 2011, the city has a population of 3.1 million, making it the tenth most populous city in the country. Located 268 km (167 miles) from the national capital New Delhi, Jaipur is also known as the Pink City due to the dominant color scheme of its buildings in old city.

Jaipur was founded in 1727 by Sawai Jai Singh II, the Kachhwaha Rajput ruler of Amer, after whom the city is named. It is one of the earliest planned cities of modern India, designed by Vidyadhar Bhattacharya. During the British colonial period, the city served as the capital of Jaipur State. After Indian independence in 1947, Jaipur was made the capital of the newly formed state of Rajasthan in 1949.

Jaipur is a popular tourist destination in India, forming a part of the west Golden triangle tourist circuit along with Delhi and Agra. The city serves as a gateway to other tourist destinations in Rajasthan like Jodhpur, Jaisalmer, Bikaner, Udaipur, Kota, Mount Abu and has two World heritage sites of Amer Fort and Jantar Mantar. On 6 July 2019, the city was named to the World Heritage Cities list.

Jaipur was founded by Rajput chief of Kachhwaha clan Jai Singh II on 18 November 1727, who ruled the region from 1699 to 1743. He planned to shift his capital from Amber, 11 kilometres (7 mi) to Jaipur to accommodate the growing population and increasing scarcity of water. Jai Singh consulted with several architects while planning the layout of Jaipur and established the city on the principles of Vastu Shastra and Shilpa Shastra under the architectural guidance of Vidyadhar Bhattacharya. The construction of the city began in 1726. During the rule of Sawai Ram Singh II, the city was painted pink to welcome Albert Edward, Prince of Wales in 1876. Many of the avenues still remain painted in pink, giving Jaipur a distinctive appearance and the epithet Pink city

## ANNEXURE II

### Evaluation Sheet for the Micro Project

**Academic Year: 2023-24**

**Name of the Faculty: Ms. Khatake S.R.**

**Course: Web Page Designing**

**Semester: 2K**

**Course code: 312004**

-----  
**Title of the project: “Tourist and Tourism”**

**COs addressed by Micro Project:**

- CO1-Use html formatting tags to present content on web page.
- CO2-Develop web page using lists and hyperlinks.
- CO3-Develop web page using images, colors and background.
- CO5-Apply presentation schemes on content using CSS.

**Major learning outcomes achieved by students by doing the project:**

**(a) Practical Outcome:**

- Describe structure of the given web html page.
- Use of the type lists in web page.
- Use of the given special character in creating web page.

**(b) Outcomes in Affective domain:**

- Follow safety practice.
- Maintain tools and equipment.
- Follow ethical practices.

**Comments/suggestions about team work /leadership/inter-personal communication**

**(if any)**

Group No.	Roll No.	Student Name	Marks out of 6 for performance in group activity (D5 Col.8)	Marks out of 4 for performance in oral/ presentation (D5 Col.9)	Total out of 10
2	18	Chavan Sameera Nivrutti			

**(Signature of Faculty)**
